

Application No. 09/849168 (Docket: DT.0101)  
37 CFR 1.111 Amendment dated 09/09/2005  
Reply to Office Action of 06/21/2005

### **AMENDMENTS TO THE CLAIMS**

Please cancel claims 2, 7, 11-12, and 22-39 without prejudice. Kindly amend claims 1, 3, 5, 8-10, 13-17, and 19 as shown in the following listing of claims. The listing of claims will replace all prior versions, and listings, of claims in the application:

#### **Listing of Claims**

1. (Currently Amended) An apparatus for determining optimum prices of products for sale, comprising:  
  
a scenario/results processor, configured to enable a user to prescribe an optimization scenario, and configured to present the optimum prices to said user, wherein the optimum prices are determined by execution of said optimization ~~scenario~~scenario, wherein said scenario/results processor comprises:  
  
an input/output processor, configured to acquire data corresponding to said optimization scenario from said user, and configured to distribute optimization results to said user, said input/output processor comprising:  
  
a template controller, configured to provide first price optimization templates and second price optimization templates, wherein said price optimization templates are presented to said user to allow for prescription of said optimization scenario, and for distribution of said optimization results, wherein said first price optimization templates comprise:  
  
a plurality of new scenario templates, configured to enable said user to prescribe scenario parameters corresponding to said optimization scenario, said plurality of new scenario templates comprising:

Application No. 09/849168 (Docket: DT.0101)  
37 CFR 1.111 Amendment dated 09/09/2005  
Reply to Office Action of 06/21/2005

a category template, for specifying a product

category for price optimization, said product

category comprising:

a plurality of demand groups, each of said

plurality of demand groups

configured to categorize a set of

highly correlated products, wherein

said highly correlated products are

normally substitute products, but

may also be complementary

products; and

a command interpreter; configured to extract commands from said

first price optimization templates executed by said user,

and configured to populate said second price optimization

templates according to result data provided for presentation

to said user; and

a scenario controller, coupled to said input/output processor, configured to

control the acquisition of said data and the distribution of said

optimization results in accordance with a price optimization

procedure;

a demand engine, coupled to said scenario/results processor, configured to model  
relationships between potential prices of the products and market demand  
for the products;

an activity based cost engine, coupled to said demand engine, configured to  
estimate demand chain costs for the products based upon said market  
demand; and

Application No. 09/849168 (Docket: DT.0101)  
37 CFR 1.111 Amendment dated 09/09/2005  
Reply to Office Action of 06/21/2005

a price optimization engine, coupled to said demand engine and said activity based cost engine, configured to employ said market demand and said demand chain costs to determine the optimum prices, wherein the optimum prices are a subset of said potential prices, and wherein the optimum prices maximize a merchandising performance figure of merit according to said optimization scenario.

2. (Cancelled)
3. (Currently Amended) The apparatus as recited ~~in claim 2~~ in claim 1, wherein said data is acquired from said user over the Internet via a packet-switched protocol.
4. (Original) The apparatus as recited in claim 3, wherein said packet-switched protocol comprises TCP/IP protocol.
5. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 2~~, wherein said data is interactively provided by and said optimization results are interactively distributed to said user.
6. (Original) The apparatus as recited in claim 5, wherein said data is acquired from a source electronic file and said optimization results are distributed to a destination electronic file, said electronic files being designated by said user.
7. (Cancelled)
8. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 7~~, wherein said first and second price optimization templates are provided according to hypertext markup language (HTML).
9. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 7~~, wherein said first and second price optimization templates are provided according to extensible markup language (XML).
10. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 7~~, wherein said first and second price optimization templates are provided ~~as Java applets~~ as applets.

11. (Cancelled)
12. (Cancelled)
13. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 12~~, wherein said plurality of new scenario templates further comprises:  
  
a products template, for specifying the products for sale, wherein the products for sale may span more than one of said plurality of demand groups.
14. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 12~~, wherein said plurality of new scenario templates further comprises:  
  
a locations template, for specifying a plurality of store groups for which the optimum prices are to be determined, wherein, when determining the optimum prices, the apparatus employs portions of said data that correspond to said plurality of store groups.
15. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 12~~, wherein said plurality of new scenario templates further comprises:  
  
a time horizon template, for specifying a time period for which the optimum prices are to be determined.
16. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 12~~, wherein said plurality of new scenario templates further comprises:  
  
an at-large rules template, for specifying rules to govern determination of the optimum prices, said rules comprising:  
  
maximum allowable price swing for each of the products for sale; and  
  
maximum allowable swing for average price of each demand group within said plurality of demand groups.
17. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 12~~, wherein said plurality of new scenario templates further comprises:  
  
a strategy template, for specifying said merchandising performance figure of merit, and for specifying limits for changes in sales volume.

18. (Original) The apparatus as recited in claim 17, wherein options for specification of said merchandising performance figure of merit comprise net profit, said sales volume, and revenue.
19. (Currently Amended) The apparatus as recited in claim 1 ~~in claim 7~~, wherein said second price optimization templates comprise:  
  
a price optimization results template, for providing said user with said result data corresponding to said optimization scenario.
20. (Original) The apparatus as recited in claim 19, wherein said result data comprises optimized values and percent change values for merchandising factors, wherein said merchandising factors comprise one or more of the following: volume, revenue, product cost, gross margin, and net profit.
21. (Original) The apparatus as recited in claim 20, wherein said result data is presented graphically.
